

# A Sustainable Future with ENTECH

**ENTECH - Environmental Technologies, Recycling and Zero Waste Expo** will gather international companies operating with the mission of a clean environment and a livable future and raise awareness in **preventing wastage, saving natural assets, adopting an environmental-friendly consumption habit and waste management** issues.

**Global Zero Waste Forum**, which will discuss sustainability, environmental technologies, and zero waste issues for the future world and take place concurrently with the exhibition, will welcome many distinguished guests to share their knowledge and experience.

In order to achieve its **sustainability** target, **ENTECH** will raise awareness through nature-conscious approaches in this area, support the industry serving the same purpose with the awareness of social responsibilities in the long term and enable it to become successful.

In order to support sustainability, **ENTECH** reflects not only its principle on saving nature but also its **devotion to trade fairs with its awareness and responsibility of consuming consciously and saving profitability.**

## We Support a Sustainable Future

We work by controlling the impact we create without damaging environment

We save energy via LED technology

We support NGOs and Faculties of Agriculture

We collect exhibition entrance cards and utilize them for reuse

We use recycled paper in all printed materials

We recycle carpeting used in the exhibition area
